PROFILE

IT professional with 2+ years of experience in technical support, IT operations, and system administration, combined with hands-on experience in software development. Skilled in troubleshooting hardware, software, networking, CCTV, and enterprise IT systems while also developing web and mobile applications using modern technologies. Enjoy building reliable IT solutions and improving operational efficiency through technical support and software development.

PROFESSIONAL EXPERIENCE

Engineering Administrator - Sinarmas Land

Jan 2025 - May 2026

(IT Operations & Technical Support)

- Provided first-level IT support for employees and tenants, resolving hardware, software, printer, and network issues.
- Performed troubleshooting and maintenance for LAN connectivity, CCTV systems, access control devices, and office equipment.
- Configured employee access cards using Pro-Watch and Fargo HDP5000 card printer.
- Supported meeting rooms by setting up projectors, HDMI devices, displays, and conferencing equipment.
- Assisted in monitoring Building Automation System (BAS) and responding to operational incidents.
- Managed work orders and maintenance schedules using SAP and internal management systems.
- Coordinated with vendors and internal technical teams to ensure timely issue resolution.

Data Administrator - PT. Bringin Gigantara

Dec 2023 – Apr 2024

(IT Operations & Technical Support)

- Processed and maintained ATM and CRM operational data for Bank BRI to ensure data accuracy and completeness.
- Verified maintenance reports and updated service records in accordance with operational procedures.
- Coordinated with internal teams and field technicians to ensure timely completion of maintenance activities.
- Assisted in preparing operational reports and maintaining documentation for daily activities.
- Ensured accurate data entry and timely reporting to support maintenance operations.

PROJECTS

Ember — Multi-Tenant Restaurant Ordering Platform (SaaS)

Tech Stack: Next.js · TypeScript · Prisma · PostgreSQL

- Developed a multi-tenant SaaS platform for restaurant ordering and management.
- Implemented secure tenant isolation, RBAC, and scalable architecture.
- Built responsive dashboards with automated testing and CI/CD.

VoidSpend — Personal Finance Mobile App

Tech Stack: React Native · Expo · TypeScript

- Developed an offline-first personal finance application using React Native and Expo.
- Built budgeting, financial reports, and custom SVG charts.
- Implemented modular state management with React Context and AsyncStorage.

Discord Management Bot

Tech Stack: Node.js · Discord.js · Railway · Git

- Developed a Discord management bot with verification, moderation, ticketing, and logging features.
- Deployed and maintained the application on Railway.
